

The knee *walks for me*, not the other way around.

I walk like Andre.

I live a very active lifestyle, I am a triathlete and a dad. It is really important that I have a knee that keeps up with me—whether hiking, playing with my kid, biking, or at the beach with the family, the Quattro performs. It's there when I need it, it's safe, intuitive, and customized for me. I feel confident with Quattro.

— Andre, Community Healthcare Coordinator

More Intuitive. Less Intrusive.

The knee *walks for me*, not the other way around.

I walk like Brenda.

When I dance with the Quattro, I feel both feet on the ground, I feel the proprioception coming out of the ground, and I feel every step I take is effortless. I just glide. I feel comfortable, it has the security I am looking for in a knee. It allows me to do moves most people would not believe I could do.

The knee *walks for me*, not the other way around.

I walk like Jack.

I spend a lot of time on the golf course and traveling with my wife. Quattro allows me to do all that with greater ease, comfort, and confidence. The Golf Mode helps my golf game substantially. It allows me to be able to put it into a preset fixed position and when I shift my weight I don't worry about losing my balance. From walking up and down slopes to getting in and out of a car, the transitions are seamless.

Jack, Retired Lawyer & Professor
